

Course schedules

In the pages below you can see the schedule of courses for the first semester of the 18/19 academic year.

The title of courses are abbreviated in the schedule; below you can see how.

When applying for courses, make sure your classes do not overlap because attendance to nearly all courses is mandatory. You are typically allowed to only miss a few classes per course per semester – details for each course are in the course descriptions.

Pay particular attention to courses taught by visiting professors, as these courses are compressed and scheduled in an irregular way. In the list below such courses and other courses that are irregular are indicated with an asterisk *. Make sure to carefully check these. Also, not all course last the full semester, so you have to check when a course starts and ends.

Not included in this schedule are the dates of exams and tests of many courses, that take place in the two weeks after the regular classes and, so the period January 28 – February 8 (2019).

Overview of abbreviations of courses in the schedule
